

Jhon Ivan D. Cuaco

I am a highly motivated and skilled IT professional seeking an information technology position where I can contribute to the company's growth through my software development and technical support skills. I'm excited to put my expertise in programming languages, relationship database management, troubleshooting, and other areas to use to promote and help drive innovation and enhance productivity. I'm confident that I can provide practical solutions and solve complex and technical challenges. I am capable of working both independently and in groups.
